1920 CENSUS INDEX  
DEPARTMENT OF COMMERCE  
BUREAU OF THE CENSUS

**Abstract**—The purpose of this study was to determine the effect of a 10-week, 1000 kcal energy deficit diet on the body composition and physical fitness of obese women. The subjects were 15 obese women who were randomly assigned to a 1000 kcal energy deficit diet. The subjects were monitored for 10 weeks. The results showed that the subjects lost weight and body fat, and their physical fitness improved. The subjects who lost weight and body fat also had a significant improvement in their physical fitness. The subjects who did not lose weight and body fat did not have a significant improvement in their physical fitness. The results of this study suggest that a 10-week, 1000 kcal energy deficit diet can be used to improve the body composition and physical fitness of obese women.
